

## Earth Timeline

This is an attempt to get an overview of how Earth evolved and who was messing with the planet and humanity. The timeline is based on information provided by Lacerta and remote viewing data provided by Farsight. The goal is to get more remote viewing data and fill the gaps.

Already obtained remote viewing data is colored **green**.

### ~ 65 million years ago:

- Animal-like dinosaurs were the predominant species on Earth.
- **There were also intelligent but primitive "dinosaur people" walking on two legs, using tools and capable of speech, see: [Annihilation of the Dinosaurs](#)**
- A humanoid advanced species from the Procyon system arrived at Earth. The first colonies were built in Antarctica and Asia.
- They came not for the biology of the planet, but for raw material, especially copper.
- They lived together with the dinosaurs without problems. (Lacerta calls them "animal-like saurians," so my guess is she's talking about the dinosaur people.)
- 150 years later, a reptilian species arrived on Earth, also interested in mining.
- The humanoids tried to communicate peacefully with the reptilians, without success, resulting in a war that started within six months.

### Remarks:

- Neither of the two advanced species is the one we call Anunnaki today.
- The humanoids were peaceful, while the reptilians were aggressing against the humanoids.
- According to Lacerta, the reptilian species didn't come from this universe.
- With a distance of 11.4 light years, Procyon is the 17th-nearest solar system and the 8th-brightest star in the night sky.

### Naming convention:

- Dinosaur people = Saurians
- Humanoid colonists = Procyans
- Reptilian aggressors = Iridians (see next point)

### Possible RV targets:

- Procyans and their homeworld, now and then. Procyon is a binary star system, so two suns must be observed.
- The aggressive reptilians now. Are there any connections to the Draco faction?

### **The cataclysm 65 million years ago:**

- A global cataclysm killed almost all life on Earth.
- According to Lacerta, the reason for the destruction was a war between the Procyans and the Iridians, in which the latter fired an experimental fusion bomb.
- The unpredictable effects of the fusion bomb created a high concentration of Iridium we still see today. That's why I named these reptilians Iridians.
- **Farsight also describes the event and the Iridians, see: [Annihilation of the Dinosaurs](#)**
- Both the Procyans and the Iridians left the planet after the cataclysm, and never returned.
- The nuclear winter ended after 200 years, resulting in a colder climate.
- The Saurians survived the climate change because they learned to live in caves.
- **The Saurians as described by Farsight were more evolved before the cataclysm.**
- In Lacerta's words, the Saurians needed 30 million years after the cataclysm to evolve from an animal to a more or less thinking being.

### Remarks:

- The climate change forced the Saurians underground, where they still live today. This could be the real reason why politics fears climate change towards warmer temperatures.

### **~ 35 million years ago:**

- According to Lacerta, natural evolution divides the Saurians into 27 sub-species over a time period of 20 million years.
- The Saurian sub-species fought many primitive wars for dominance.
- 24 of these sub-species went extinct over time.

### **~ 15 to 10 million years ago:**

- 3 advanced Saurian species were remaining on Earth.
- Natural and artificial crossbreedings as well as genetic engineering united the 3 species to one, which is the species Lacerta belongs to.
- The united Saurians evolved towards a more humaniod and mammal-like appearance.
- They colonized other planets of the solar system.
- Small simians started to grow and came down from the trees to the ground.

### Possible RV target:

- The Saurian civilization and culture at its peak, when they were colonizing planets.

### ~ 1,5 million years ago:

- Another alien species arrived at Earth.
- According to Lacerta, they came from Aldebaran and were the first species visiting Earth since the cataclysm, which is surprising.
- The interest of this humanoid species was the ape population on Earth.
- The humanoids started to manipulate the genes of the apes in order to create slaves.

#### Remarks:

- This second humanoid species visiting Earth is the one we call Anunnaki today. Lacerta calls them "Ilojiim". I will stick to Anunnaki.
- Lacerta describes the Anunnaki as a very tall humanoid species with usually blonde hairs and a very white skin.
- The Anunnaki seem to be aggressive, as they "acquire" Earth despite the Saurian presence and believe in the legitimacy of slavery.

#### Possible RV targets:

- Why was Earth left alone for 60 million years? Given the fact that Procyon is not far away, why did the Procyans never return?
- The arrival of the Anunnaki and how they interacted with the Saurians and apes.
- Real reason for the Anunnaki's interest in the apes.
- The Anunnaki's homeworld and culture. Are the Anunnaki and the Orion Empire the same, or somehow connected?

### ~ 700,000 years ago:

- The Anunnaki, after leaving and returning to Earth several times, managed to create the first advanced human species that was capable of speech and using technology.
- A few centuries later, the Anunnaki decided to extinct the first human species and create a second version.

#### Remarks:

- The Saurians seem to have tolerated the new human population on Earth, despite the fact that the Anunnaki told them that the Saurians are evil.

#### Possible RV targets:

- Why are the Saurians tolerating the Anunnaki's tampering with Earth?
- The creation and extinction of the first human species.

**~ 75,000 years ago:**

- The 5th version of humans built the first Pyramids in Egypt.

**~ ???:**

- The creation of the 6th human version led to a war between the Saurians and Anunnaki.

Remarks:

- The Saurians must have lost the war, as a 7th human version was created.

**~ 16,000 years ago:**

- The 6th human version built the cities which ruins can be found today beneath the sea in the so-called Bimini Area.
- Saurian archeologists find the "memory plate" somewhere in North America.

Remarks:

- According to Lacerta, the memory plate has been manufactured by the Procyans 65 million years ago. The plate is the reason why the modern Saurians know so much about the war between Procyans and Iridians.

Possible RV targets:

- The human cities in the Bimini Area now and then.
- The creation of the memory plate.

**~ 8,500 years ago:**

- Creation of the 7th human version, which is the one still existing today.
- The Saurians fought a second, longer war against the Anunnaki.

Remarks:

- After so many versions of humanity, why were the Anunnaki still not happy with the results?
- This time, the Saurians and Anunnaki seem to be more equal in strength, which could mean that the Anunnaki were weakened by someone else.

### **~ 2,944 BC:**

- 4,943 years before the Lacerta interview in 1999, the Anunnaki left the planet from one day to another for unknown reasons.

#### Possible RV targets:

- What happened to the Anunnaki? Why did they leave in such a hurry?

### **~ 1926:**

- 73 years before the Lacerta interview in 1999, a "cold war" started between two hostile species who are operating on Earth.
- To Lacerta in 1999, a third hostile species seemed to be the "winner" of the cold war, and she expected a hot war within a few years or decades.

#### Possible RV targets:

- What changed around 1926? Why was there no cold war before that date?
- Who are these hostile species exactly?

### **1995 or 1996:**

- According to Lacerta, there were rumors of a 15th alien species that started operations on Earth, but she didn't know whether the rumors are true.

#### Remarks:

- The interest in operations on Earth seems to stem from the fact that it's a prison planet with a large population unable to defend itself. Hostile ETs want to benefit from the human condition like vampires, while others seem to observe out of curiosity.

#### Possible RV targets:

- When did the Draco reptilians arrive at Earth? Did they conquer Earth in a war?
- Who built the Death Traps, and when?
- Who "owns" the Death Traps today?
